

Client Case Study

Primary Water Treatments

Primary Water Treatments Ltd use Latis Scientific for all areas of water sampling, enclosed and domestic systems. We offer them closed systems analysis against BSRIA BG29 standards, as well as potable drinking water.

Primary Water Treatments were particularly happy with Latis Scientific's fast turnaround time. This, combined with our customer services ensured timely handovers and speedy results.

Latis Scientific are unique in their technical follow up with clients. Our dedicated technical team provide aftercare and advice to clients to enable them to interpret their results. This is something that truly benefited Primary Water Treatments. Jan Ford, General Manager at Primary Water Treatments, commented "Utilising the skills of Latis Scientific can only enhance the services provided to your client. (Latis) are swift and helpful at processing samples with the technical expertise to back it up".
